🔗 [LeetCode](#)

SUMMARY

- Full Stack Developer experienced in designing and deploying scalable web applications with clean architecture, efficient API and database design, performance optimization, and secure authentication mechanisms.
- Strong problem-solving foundation with 200+ LeetCode and GeeksforGeeks problems solved, enhancing data structures and algorithms proficiency.

EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in CSE - CGPA - 8.74

2023 – Present

Kottayam, India

Jiya Lal Mittal DAV Public School

Senior Secondary (Class-XII) - CBSE - 92.8%

2022

Gurdaspur, India

RELEVANT COURSEWORK

- DBMS
- Operating Systems
- Parallel & Distributed Computing
- Computer Networks
- Software Architecture

TECHNICAL SKILLS

Languages: C, C++, Python, HTML, CSS, JavaScript, SQL

Developer Tools: VS Code, Git, GitHub, Figma, Postman

Databases & Cloud: MongoDB, PostgreSQL, MySQL, DynamoDB, Docker, Kubernetes

Technologies/Frameworks: React.js, Tailwind CSS, Node.js, Express.js, Socket.IO

PROJECTS

Monify | React.js, Node.js, Express.js, MongoDB, Tailwind CSS | **Code:** 📄 | **Live Demo**

- * Developed a full-stack personal finance management platform with responsive, user-friendly dashboards to track **income, expenses, and budgets** efficiently.
- * Implemented **secure authentication and authorization** using JWT, cookies, access and refresh tokens, and integrated Google OAuth for seamless login.
- * Built RESTful APIs with Node.js and Express.js, managed data with MongoDB, and implemented **CRUD operations** for transactions, budgets, and savings goals.
- * Added features including **expense categorization, automated recurring transactions with email notifications, budget alerts, savings goal tracking**, and interactive **data visualization dashboards** for actionable insights into spending patterns.

Forever | React.js, Node.js, Express.js, MongoDB, Tailwind CSS | **Code:** 📄 | **Live Demo**

- * Engineered a full-stack e-commerce platform enabling users to **browse, filter, and securely purchase products** using the MERN stack, resulting in a smooth and intuitive shopping experience.
- * Implemented **JWT authentication and protected routes**, ensuring secure access for users.
- * Built an **admin dashboard** to add, list, update, and delete products using REST APIs, increasing product management efficiency.
- * Integrated **Stripe payment gateway** for secure and reliable transactions with real-time confirmation.

Multi-Agent Pathfinding Simulator | Python, A*, Pygame, Multiprocessing | **Code:** 📄

- * Developed a **2D simulation system** to visualize multiple agents navigating a grid using the **A* pathfinding algorithm** with obstacle and collision avoidance.
- * Implemented **parallel path computation** using Python **multiprocessing** to improve performance and scalability.
- * Built an **interactive GUI** with **Pygame** for real-time agent movement and environment configuration.
