LeetCode

EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in CSE - CGPA - 8.67

2023 – Present

Kottayam, India

EXPERIENCE

Tata Consultancy Services - Research

May 2026 - July 2026

R&D Intern

Hyderabad, India

- Engineered **onboarding and dashboard modules** within a **layered, multi-service payment system architecture** (CBDC/UPI-style), using **Python, SQLite, and Streamlit**, with each service layer enforcing **least-privilege access** to its own owned tables.
- Developed a **4-step user registration workflow** (Personal Info, Demographics, CKYC/Documents, Security), coordinating **data flow and validation across SIE, ROUTER, PIMS, CKYC and PSO** service layers with strict table ownership boundaries.
- Built the **dashboard module** enabling users to **link/unlink VPAs, create and delete wallets, check balances, and deregister from SIE or CBDC**.

TECHNICAL SKILLS

Languages: C, C++, Python, HTML, CSS, JavaScript, SQL

Generative AI: LangChain, RAG, HuggingFace Embeddings, Whisper, Mistral AI

Developer Tools: VS Code, Git, GitHub, Figma, Postman

Databases & Cloud: MongoDB, PostgreSQL, MySQL, SQLite, ChromaDB, AWS, Docker, Kubernetes

Technologies/Frameworks: React.js, Node.js, Express.js, FastAPI, Tailwind CSS, Streamlit

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Object-Oriented Programming, Cloud Computing, Machine Learning, Blockchain

PROJECTS

MeetMind AI | Python, React, FastAPI, LangChain, ChromaDB, Mistral AI, Whisper | **Code:** 

- Built a **full-stack AI meeting assistant** using **React, Tailwind CSS, and FastAPI** that converts audio/video into structured summaries, action items, and decisions using a **map-reduce LLM pipeline**.
- Developed a **Retrieval-Augmented Generation (RAG)** chatbot using **LangChain LCEL, ChromaDB, and Hugging Face Embeddings**, allowing users to interactively query meeting transcripts.
- Implemented **dual transcription engines** (Whisper & Sarvam AI) with automatic language routing, audio chunking, and YouTube integration to support robust multilingual processing.
- Engineered a high-performance backend with **Server-Sent Events (SSE)** for real-time progress streaming, and integrated an **SQLite database** for persistent meeting history and chat sessions.

Monify | React.js, Node.js, Express.js, MongoDB, Tailwind CSS | **Code:**  | **Live Demo**

- Developed a full-stack **personal finance management platform** with responsive dashboard to track income, expenses, and budgets.
- Designed and implemented a **token-based authentication system** (JWT, httpOnly cookies, access/refresh token rotation, **Google OAuth**) to enforce secure session boundaries, alongside **REST APIs** for CRUD operations.
- Added **automated recurring transactions with email notifications, budget alerts, and savings goal tracking**, along with interactive **data visualization dashboards** for actionable spending insights.

Forever | React.js, Node.js, Express.js, MongoDB, Tailwind CSS | **Code:**  | **Live Demo**

- Engineered a full-stack **e-commerce platform** enabling users to browse, filter, and securely purchase products with a smooth, intuitive shopping experience.
- Implemented **JWT authentication** and **protected routes** for secure access, and built an **admin dashboard** to add, list, update, and delete products via REST APIs.
- Integrated the **Stripe payment gateway** for secure, reliable transactions with real-time confirmation.

ACHIEVEMENTS

- Solved **350+** coding problems on **LeetCode** and attained a peak **Contest Rating of 1538**.
